

I respectfully urge the FCC to reject the NAB Petition 04-160. XM and Sirius should be allowed broadcast instant traffic and weather. The US economy thrives on innovation and change. If the dinosaurs of the radio industry's feel threatened by improvement then they should improve the quality of programming that is offered. Not use the government and ex-employees of the FCC such as Marsha MacBride to buy a few more years for the current dinosaurs of the radio industry to exist.

Sincerely,
Craig Ratliff
